

Test Applications

TEST**AUTOMATIC HIGH VOLTAGE ELECTRICAL TEST SYSTEMS**

Fast, smart and automatic - the ideal solution for testing all forms of electrical components and assemblies

- Sector leading design features:
 - Robust, reliable hardware with components off the shelf
 - Unique, flexible software that integrates with test programmes and results databases
- The MK Test service includes:
 - Consultancy to ensure your new testing equipment improves your efficiencies
 - Tailoring of equipment to meet your specific testing needs
 - Support to ensure software is configured to integrate with your existing systems
- Test programmes typically created by:
 - Automatic download from customer database
 - Manual creation via MK test management software
- Operator logon ensure operator traceability

Rapid, Accurate, Automatic, Simple to Use

The **MK TEST** Systems' high voltage test system automates your testing process. Testing multi core / multi contact assemblies via our high voltage switching matrix system, the system delivers clear test reports that show measured values AND diagnose faults to enable fast repair and completion.

The **MK TEST** system is delivered complete with MK's test management software that enables simple creation of test programmes for any electrical assembly via netlist import and/or auto learn. Operator instructions guide the test engineer to ensure fast, correct operation.
